

Feather River Air Quality Management District

District Rule 3.22 - Annual Analyzer Form for Prime Stationary Engines

Due by March 31 every year

Calendar Year:

Section I - Facility Information

Permit Issued to:

Facility Address:

City: State: CA Zip Code:

Facility ID:

Engine Model:

Engine Serial Number:

Catalyst Model & SN (if applicable):

If a source test was performed this year, please check this box and skip Section II and III.

Section II - Analyzer Emission Data

Engine Emission Limits: (as stated on the P/O)	O2, % (dry) <input type="text" value="15.0"/>	NOx, ppmv @ 15% O2 <input type="text"/>	CO, ppmv @ 15% O2 <input type="text"/>	
Portable Analyzer Data:	O2, % (dry) <input type="text"/>	NOx, ppmv @ 15% O2 <input type="text"/>	CO, ppmv @ 15% O2 <input type="text"/>	Test Date <input type="text"/>

If the analyzer data is below the Engine Emission Limits, please check this box and skip Section III.

Section III - Incident Report

The facility has 15 days from the initial portable analyzer test date to correct the problem and retest the engine. Please attach additional sheets as needed.

Incident Description:

Cause (to extent known):

Corrective Actions Taken:

Portable Analyzer Data after Corrective Action:	O2, % (dry) <input type="text"/>	NOx, ppmv @ 15% O2 <input type="text"/>	CO, ppmv @ 15% O2 <input type="text"/>	Test Date <input type="text"/>
---	-------------------------------------	---	--	-----------------------------------

If the Portable Analyzer Data after Corrective Action is still above the Engine Emission Limits, the engine will either be shutdown or the facility shall apply for a variance. In both scenarios, the District shall be informed immediately.

Engine Shutdown Date:

Variance Petition File Date: Variance Number:

Section IV - Certification Statement

I certify under penalty of law that based on information and belief formed after reasonable inquiry, the statements and information in this document and in all attachments and other materials are true, accurate and complete.
